

The Brown University Club of Southwest Florida

Join us for a glass of wine and a tour of the roving red planet:
looking for life on ancient Mars

Ralph E Milliken,

Associate Professor of Earth, Environmental, and Planetary Sciences

Thursday, April 15, at 5:00 pm

NASA now has two rovers, Curiosity and Perseverance, exploring ancient lake and delta environments on Mars. This has provided us with unprecedented insight into what Mars was like over 3 billion years ago and whether or not the planet may have harbored life. Join us to learn how researchers at Brown have been exploring Mars with these rovers, the role they played in helping select the landing sites for these amazing missions, and the next big steps in extraterrestrial exploration.
